DETAILED ACTION

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114.

Applicant's submission filed on 10/28/03 has been entered.

Claims 11-12, 19-20 and 27-55 are pending.

Claims 1-10, 13-18 and 21-26 have been canceled previously.

2. Applicant's submission of Search Reports on the Information Disclosure Statement, filed 10/28/03, is acknowledged, however these citations have been crossed out as they are not appropriate for an IDS.

3. Upon a review of the file application, New Grounds of Rejection have been set forth herein to address satisfying the enablement issues under 35 USC 112, first and second paragraphs, with respect to the 7C10 and 16C10 antibodies, recited in the instant claims.

4. The following is a quotation of the first paragraph of 35 U.S.C. § 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

5. Claims 19, 34-39, 42, 44- 50, 53 and 55 are rejected under 35 U.S.C. 112, first paragraph, as containing subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention

It is apparent that the 7C10 and 16C10 antibodies are required to practice the claimed invention. As required elements, they must be known and readily available to the public or obtainable by a repeatable method set forth in the specification. If they are not so obtainable or available, the enablement requirements of 35 USC 112, first paragraph, may be satisfied by a deposit of the pertinent cell lines / hybridomas which produce these antibodies. See 37 CFR 1.801-1.809.

In addition to the conditions under the Budapest Treaty, applicant is required to satisfy that all restrictions imposed by the depositor on the availability to the public of the deposited material will be irrevocably removed upon the granting of a patent in U.S. patent applications.

Amendment of the specification to recite the date of deposit and the complete name and address of the depository is required. As an additional means for completing the record, applicant may submit a copy of the contract with the depository for deposit and maintenance of each deposit.

Art Unit: 1644

If the original deposit is made after the effective filing date of an application for patent, the applicant should promptly submit a verified statement from a person in a position to corroborate the fact, and should state, that the biological material which is deposited is a biological material specifically identified in the application as filed, except if the person is an attorney or agent registered to practice before the Office, in which the case the statement need not be verified. See MPEP 1.804(b).

Applicant is reminded that affidavits and declarations, such as those under 37 C.F.R. § 1.131 and 37 C.F.R. § 1.132, filed during prosecution of the parent application do not automatically become a part of this application. Where it is desired to rely on an earlier filed affidavit, the applicant should make the remarks of record in the later application and include a copy of the original affidavit filed in the parent application.

Alternatively, it is noted that the sequence of an entire immunoglobulin satisfies the enablement of said immunoglobulin. Note that satisfaction for the biological deposit of the specific 7C10 and 16C10 antibodies requires the disclosure and recitation of its entire amino acid sequence and not based upon partial sequences.

6. Claims 19, 34-39, 42, 44- 50, 53 and 55 are rejected under 35 U.S.C. § 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 19, 34-39, 42, 44- 50, 53 and 55 are indefinite in the recitation of "7C10" and "16C10" because their characteristics are not known. The use of "7C10" and "16C10" monoclonal antibodies as the sole means of identifying the claimed antibodies renders the claims indefinite because these are merely laboratory designations which do not clearly define the claimed products, since different laboratories may use the same laboratory designations to define completely distinct cell lines .

Amending the claims to recite the appropriate ATCC Accession Numbers would obviate this rejection

Alternatively, providing the appropriate SEQ ID NOS. that encode the entire "7C10" and "16C10" antibodies would satisfy the indefiniteness of the laboratory designations.

Applicant is reminded that the amendment must point to a basis in the specification so as not to add any new matter. See MPEP 714.02 and 2163.06

7. As indicated previously, the instant claims drawn to Crohn's disease by administering an anti-CD80 or a CD80-binding fragments thereof sufficient to inhibit the binding of B cell and T cells via the CD80/CD28 pathways, where said antibody or fragment thereof binds specifically to CD80 antigen without inhibiting the binding of CD80 antigen to CTLA-4 appears free of the prior art.

Accordingly, claims 11-12, 20, 27-33, 40, 41, 43, 51, 52 and 54 are deemed allowable
